User manual

> **Caution!**
> Each resident needs a PIN (personal identification number) to open the front door or to adjust the settings.
> The factory default code (1234) should be replaced as soon as possible with a new PIN by following the instructions in the Settings section on page 8.

Brief description

The outdoor station **..TPAS/W** includes a touch panel for convenient search and selection of the desired resident (ideal for large numbers of residents).

The resident can open the front door with his PIN on the touch panel and enter the editing menu, where he himself can change his displayed name and the PIN.

The screensaver content (such as the house address) for the touch panel can be adjusted by the administrator (caretaker).
The administrator also has access to the resident data and other configurations of the TPAS/W external unit, using his admin-PIN.

The ..TPAS touch panel is preconfigured to give additional visual and acoustic signals in accordance with the standard "SIA500 for obstacle-free buildings".
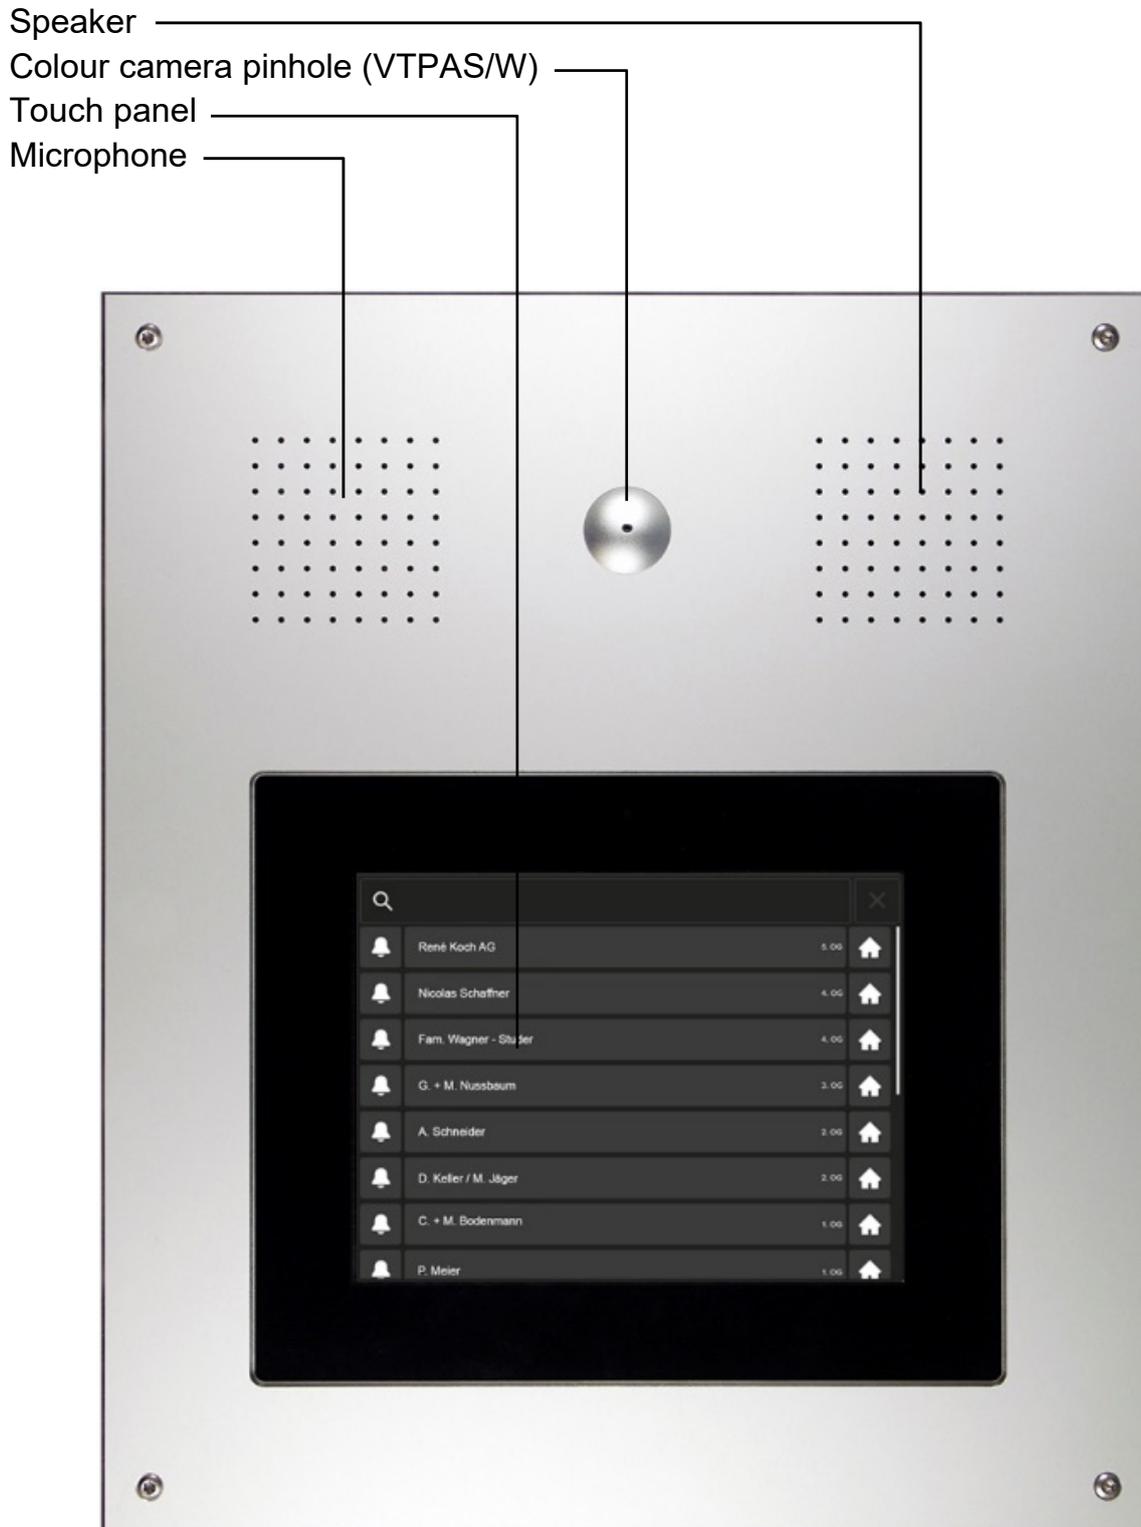

The outdoor station ..TPAS/W is available in 2 versions:
VTPAS / W: video door intercom system
ATPAS / W: door intercom system (without video)

User manual

Operating the door intercom (by the visitor)
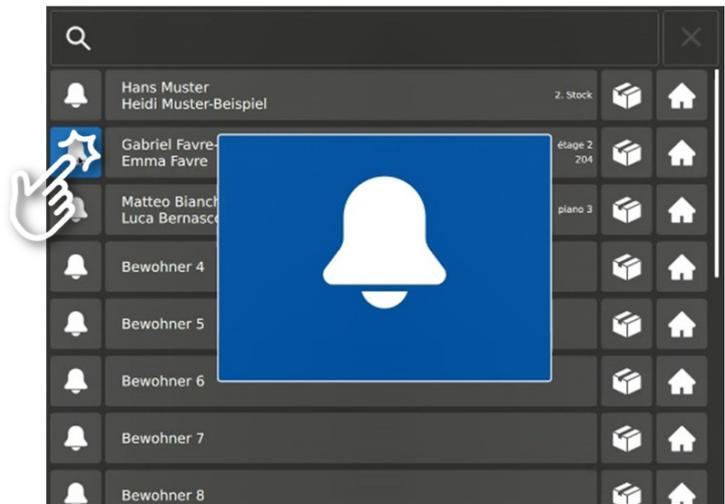

Find the resident

• tap on the search field and type in the resident's name or scroll down the list of names

Call up the resident

• press the call button (bell)

A call confirmation tone rings and at the same time a flashing bell symbol appears

The talking* and the door opening* are visualized with a symbol

* The building norm SIA500 for obstacle-free buildings requires door intercom systems to indicate important processes acoustically <u>and</u> visually (two-senses principle).

Cleaning

Clean the display and the aluminium plate with a dry or slightly damp cloth.
Use a household detergent to remove stains that are more stubborn.

- ➥ **Prevent any water from entering the unit!**
- ➥ **Do not use any sharp or abrasive cleaning agents!**
